RE: Smart Horizons

Dear Skip

This is the first year Dixie County has used Smart Horizons. The students selected to participate in Smart Horizons are finding the program easy to navigate so they can focus on working through coursework. Feedback from parents and students has been extremely positive. Support from Smart Horizons has also been quite helpful. We appreciate the opportunity that Smart Horizons is able to offer students a high school diploma rather than a certificate of completion. The fact that Smart Horizons offer a variety of industry certifications is another positive aspect. We feel that this not only benefits our students and their families, but our community as well. We are looking forward to continuing our partnership with Smart Horizons next year.

Thanks so much for all you do for our students!

**Denee Hurst**  
Director of Curriculum
